SK02: NetView / ITM Integration Workshop

Course Description

Format

Classroom Workshop

Duration

1.5 days

Description

This is an advanced workshop covering integration techniques between Tivoli NetView and IBM Tivoli Monitoring (ITM).   Both NetView on Unix and NetView on Windows will be discussed. The workshop will focus largely on the new servmon and itmquery functions available with NetView 7.1.4.

Prerequisites

Students **must** have a good working knowledge of Unix & shellscripting, Tivoli NetView and ITM. Some knowledge of Tivoli Framework and Tivoli Enterprise Console (TEC) would also be beneficial. Prior attendance on basic NetView and ITM classes, or equivalent minimum experience, is **mandatory**.

Audience

This course is aimed at technical IBM consultants, business partners and customers requiring in-depth knowledge of NetView / ITM integration capabilities.

Curriculum Relationship

This workshop requires previous attendance on basic NetView and ITM classes. It touches on Tivoli Enterprise Console (TEC). Students requiring more details on NetView / ITM / TEC integration should consider attending SK01 "NetView / TEC Integration Workshop" and SK03 "NetView / TEC / ITM Integration Workshop".

Objectives

At the end of the class, students should have significantly enhanced their ability to craft integration solutions between NetView and ITM.

A large practical content should have increased a student's confidence and experience in customizing these options.

Sample code will be made available to students from which they can develop their own customized solutions

Contents

- NetView / ITM Integration Architecture
- Configuring NetView to monitor ITM Servers and Services
- Configuring ITM to manage NetView Servers
- Overview of integration between NetView, ITM and TEC
